# ALAN PAUL JOHN

**9633022631 | alanpauljohn385@gmail.com | linkedin.com/in/alan-paul-john |**

**github.com/alan123-source**

## SUMMARY

Computer Science undergraduate (KTU) with a strong foundation in Data Structures and Algorithms and hands-on experience in backend development using Express.js. Built multiple projects through a project-based learning approach and serving as Chief FOSS Ambassador, leading team initiatives successfully. Seeking a software engineering internship to apply technical and problem-solving skills.

## EDUCATION

### Bachelor of Technology in Computer Science

College of Engineering Poonjar, APJ Abdul Kalam Technological University (KTU)
2023 – Present
CGPA: 6.9

## SKILLS

**Languages**: JavaScript, Python ,Embedded C

**Web:**HTML,CSS,React,Node.js,Express.js

**Database**: MongoDB ,SQL

**Tools**: Git, GitHub,Docker,Docker compose,Render,vercel,MongoDB Atlas

**Concepts**: Data Structures and Algorithms, REST API, Authentication, CRUD Operations

## PROJECTS

**E-Commerce Platform with Personalized Product Recommendations**
**(React, Node.js, Express.js, MongoDB, Stripe, Docker)**

• Developed and deployed a full-stack MERN e-commerce platform featuring authentication, shopping cart, wishlist, order management, reviews, and admin dashboard functionalities.

• Implemented JWT-based authentication, coupon management, product recommendations, Stripe payment integration, and email notifications.

• Documented APIs using Swagger, tested backend services with Jest, and deployed the application using Render, Vercel, Docker, and MongoDB Atlas.

### Automatic Air Quality Monitoring and Ventilation System (IoT)

- Developed IoT system using Node MCU and gas sensors MQ-135 for air quality monitoring
- Implemented digital values based logic to automate ventilation
- Led team development and contributed to documentation using LaTeX

## LEADERSHIP & RESPONSIBILITIES

### Chief FOSS Ambassador (Current)

### Vice Chair – FOSS Club (3rd Year)

- Contributed to planning and execution of club initiatives

### Team Lead – Mini Project (IOT Air Quality Monitoring System)

- Led a team to design and develop an IoT-based air quality monitoring and ventilation system

- Managed task distribution, coordination, and ensured timely completion of the project ,Contributed to project documentation and report preparation using LaTeX
